

MANUFACTURING FOR MEDICAL DEVICES

As an ISO 13485 certified by NSF-ISR & FDA Registered manufacturing partner, Levison Enterprises is ready to tackle your next medical device project. An ECM of choice within the industry, we have the knowledge and expertise to see your medical device product from concept to prototype to production.

DESIGN & DEVELOPMENT

More than just manufacturing, we can help you brainstorm your ideas off the drawing board or optimize your existing design, and create a more efficient and robust design before you begin production. From design and development, assembly, finishing, and shipping, we will step in where and when you need us and get your project off the ground.

TURNKEY SOLUTIONS

Why trust your revolutionary project to bounce between multiple contractors? Levison Enterprises offers turnkey solutions that keep your development and manufacturing all under one roof. We have the expertise and equipment already in place. Levison offers fully integrated assembly including but not limited to PCB assembly, cable assembly, & wire harness assembly. With our on-site engineers, we can eliminate any production or functionality problems right on the spot.

IN-HOUSE ENGINEERS

Our on-site engineers are troubleshooting experts. They are already in-house and will always be on hand to uncover issues that could potentially delay your timeline or break your budget. They are the second set of eyes that guarantee your project's success. Offering engineering services for the redesign for obsolescent parts, mechanical engineering, power systems engineering, electronic engineering, packaging design, and user interface functionality.

AFFORDABILITY

We can deliver the best possible product at the lowest cost. As a domestic medical device contract manufacturer, we work harder to find ways to save you money. Plus, you reduce the risk of low-quality manufacturing that can occur while trying to save money outsourcing overseas.

WE'RE LOOKING FOR A PARTNER

As an ISO 13485 certified by NSF-ISR & FDA registered manufacturer, Levison Enterprises can help you disrupt the industry with design optimization and forward-thinking manufacturing efficiency for medical devices.
